

I need to know

Verse 1

While we tried to go along the right way
There was no more passion
All this time, the pain distorts your vision
Close your eyes and listen

Pre chorus

If you think you'll drown
I'll save you

There's no need to cry
I beg you

Chorus

I need to know
If you need me again
I need to know
to keep the stress away
I need to know
You better leave your sorrow
Leave (it) behind you now...

Verse 2

All the time, the pain distorts your vision
Close your eyes and listen
While we tried to go along the right way
There was no more passion

Pre chorus

If you think you'll drown
I'll save you

There's no need to cry
I beg you

Chorus

I need to know
If you need me again
I need to know
to keep the stress away
I need to know
You better leave your sorrow
Leave (it) behind you now...
